

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, HTML, CSS, SQL
- **Technologies/Frameworks:** React JS, Next JS, Node JS
- **UI Libraries:** Bootstrap, Material-UI, Ant-Design
- **Developer Tools:** VS Code, Git, Postman
- **Database:** MySQL, PostgreSQL

EDUCATION

VSITR

Bachelor of Engineering in Computer Engineering

Kadi, Gujarat

Jan 2021 - Apr 2024

WORK EXPERIENCE

Rayvat Intelligent outsourcing

Sep 2024 - Current

- Developed and maintained multiple large-scale React applications with real-time data handling and optimized performance.
- Collaborated closely with backend teams to integrate secure RESTful APIs and ensure smooth data flow across modules.
- Improved UI/UX by implementing reusable components, responsive layouts, and accessibility best practices.
- Played a key role in debugging, reducing load times, and enhancing cross-device responsiveness.
- Contributed to four major client projects, focusing on scalability, maintainability, and clean architecture.

Shivinfotech, Ahmedabad (Intern)

Mar 2024 - Aug 2024

- Developed an event management system in React for event creation, scheduling, and live updates.
- Improved component reusability, form validation, and state management with custom hooks.

BISAG-N, Gandhinagar (Intern)

June 2023 - Dec 2023

- Designed and built a real-time chat app in React with live messaging, typing indicators, and notifications.
- Focused on responsive design, accessibility, and seamless API integration.

PROJECTS

JenyaTrack Hrms (React, Node.js)

- Developed core HRMS modules including Attendance, Recruitment, and Test Management.
- Implemented real-time employee attendance tracking.
- Streamlined the recruitment process from application to evaluation.
- Enhanced testing functionalities for candidates and employees.
- Improved system efficiency through automation and modern UI/UX.
- Designed scalable architecture to support future enhancements.

TradeIQ (React, Redux Toolkit)

- Developed a stock trading and portfolio management platform.
- Integrated Axios for real-time stock data retrieval and updates.
- Built reusable components and modular layouts for maintainability.
- Managed global state efficiently using Redux Toolkit.
- Focused on responsive design and intuitive user experience.

Omeeyo (Next.js)

- Developed a travel and e-commerce platform with an integrated admin dashboard.
- Used Next.js, Tailwind CSS, and shared UI components for consistent design and performance.
- Implemented features such as recently viewed items, wishlist, and secure debit/credit iframe integration.
- Partnered with Viator API for travel experiences and package integrations.
- Focused on creating a responsive, user-friendly interface with high performance and modular structure.
